In an effort to improve the safety of TTC riders while supporting Toronto's local artists, we propose Streetcar Safety Murals. At select stops on the busiest routes, the road space between the sidewalk and the streetcar, stretching the length of the streetcar, will be covered with a mural.

The mural will bring awareness to the safety zone where cars are not supposed to enter if the streetcar’s doors are open. The signage on streetcars has proven ineffective. Through extra visibility and public service announcements, Streetcar Safety Murals is a cost efficient, community-supporting initiative.
